

STAI ASSIGNMENT-1

Biswajit Kumar Senapati
2241011366, SEC:-08

1) It is necessary to express dharma in scientific language to make it:

- Universally understandable and rational
- Verifiable and logical rather than purely philosophical
- Applicable to modern scientific discussions
- Free from ambiguity and subjective interpretation

2) Planned cities with grid pattern

- Advanced drainage system
- Use of baked bricks
- Public structures like Great Bath
- Well-organized roads and houses

3)

Haxapan	vedic
Urban	Rural
Bricks	Wood, thatch
Systematic	Less planned
Cities, drainage	Huts, altars

4) • Darwin: Natural selection, survival of the fittest
• Buddhism: Diversity arises from karma and dependent origination

5) • Ratio of brain size to body size
• Indicates intelligence level
• Humans have the highest value

6) • Stupa: Dome-shaped structure storing relic of Buddha
• Vihara: monastery for monks (residential + educational)

- 7) Nagars (North India)
- Dravida (South India)
 - Vesara (Mixed style)

8) structures carved directly from solid rock
(e.g., caves, temples like Ajanta & Ellora)

9) Variation exists in species

- Overproduction of offspring
- Struggle for existence
- Survival of the fittest
- Natural selection leads to evolution

- 10) • medicine & surgery
- Diet and lifestyle management
 - Preventive healthcare
 - Holistic healing (body + mind + spirit)

11) originates from Vedas (mainly Atharva Veda)

- over 3000-5000 years old
- Systematized in texts like Charaka Samhita

12) • Surviving • Basic adaptation

- Surviving: using knowledge/technology to control or overcome nature

13) Developed during Vedic & Classical periods.

- Flourished with Charaka & Sushruta
- Declined during medieval invasions
- Revives in modern India

- 9) Applied in veterinary science (animal care)
• Plant health and agriculture practices
- 15) Spread via trade routes and scholars
• Influenced Chinese, Tibetan and Arabic medicine
- 16) Karma is a subtle material substance that binds to the soul due to actions & determines future experiences.
- 17) Called Jyotisha, During the brahmana period, Jyotisha emerged as one of the six Vedanga. The Vedanga Jyotisha, compiled around 1400 BCE, is one of the oldest astronomical text and served primarily to:
- Established proper timing for vedic rituals and sacrifices by tracking lunar and solar cycles.
 - Determine auspicious dates and times for religious ceremonies
 - Track planetary positions and stellar movements.
- 18) Humans have long-term goals and conscious effort
• Leads to higher intelligence and development
- 19) Described as Circular/Plat with cosmic layers
• Supported by cosmic order (rita)
- 20) Attributed to Sage Atri, The Rig-veda does not explicitly name any individual as having calculated solar eclipses. However, astronomical phenomena including eclipses are referenced in vedic texts.
